## CALF REARING ESSENTIALS

**DAY 1: COLOSTRUM** – Calves need to absorb at least 100 grams of IgG to effectively acquire an adequate passive transfer of antibodies

 <p><b>Wessex Calf Colostrum</b></p>	<p>Quality colostrum supplement. Very economical to feed in addition to maternal colostrum. 24% Oil &amp; 25% Protein</p>	200g 1kg 4kg
 <p><b>Provita Calf Colostrum</b></p>	<p>Quality colostrum supplement. High in fat soluble vitamins A, D and E to compensate for the inefficient placental transfer of these vitamins.</p>	300g
 <p><b>First Feed Colostrum Complete</b></p>	<p><b>**NEW PRODUCT**</b> A 'Genuine Colostrum Replacer', so can be used effectively when there is NO maternal colostrum available or where it is not advised to feed farm derived colostrum. It can be used to supplement farm produced colostrum when the quality is expected to be low. Feed at 500-600 grams per feed depending on birth weight for optimum 'Passive Transfer'. When fed at the standard feed rate, there is no colostrum product available with the levels of specific antibodies that 'First Feed Complete' offers. 3kg = 5-6 feeds</p>	3kg
 <p><b>Cosy Calf Jackets</b></p>	<p>Put every calf in a jacket as soon as they are dry. Calves do not perform as well under 12°C and will require additional feed, so keep them warm in a jacket.</p>	Single

## ADDITIONAL HEALTH SUPPLEMENTS

 <p><b>ECR "Protein Feed Tubes"</b></p>	<p>Contains specific egg protein derived antibodies to E-coli, Rotavirus, Coronavirus, Salmonella &amp; Cryptosporidium. Administer as soon as possible after birth.</p>	3 Calf Feeds
 <p><b>Roto-Corona Plus Paste</b></p>	<p>Contains Colostrum, High levels of egg proteins, Pre and Probiotics, Balanced blend of vitamins and minerals, Oil based blend to provide essential energy Each syringe is effective against: E-coli, Salmonella, Cryptosporidium, Rotavirus</p>	1 Calf Feed

### CALF MILK 'TEAT' FEEDERS

<b>Speedy Feeder - Complete Set</b> 	2 ½ litre bottle complete with teat and stomach tube	Single
---	--	--------

<b>Trusti Tuber kit – Complete</b> 	Complete with teat & unique stomach tube feeder - Up to 200kg animals. A unique colostrum-feeding kit. Its design ensures tubing is safer, easier and more comfortable for the calf. It allows feeding to be done more quickly and with less stress for both calf and farmer.	Single
<b>Wydale Calf Milk Feeder</b> 	The original calf milk feeder. Designed for fast, efficient group feeding of calves whilst maintaining an individual approach and promoting improved digestion of milk.	Single (Various options)
<b>Milk Bar Milk Feeders</b> 	Single calf up to 20 calves. The unique slow feeding Milk Bar™ teat is designed with an internal web and an inverted nipple. Together, they control the flow rate of a calf feeding as it would do naturally on its mother.	Single
<b>Pyon Heatwave Feeder</b> 	Feeds up to 30 calves from one machine. The Heatwave® milk warmer is a cost effective yet labour saving ad lib machine, converting a cold supply of milk in to a warm feed. This system feeds up to 30 calves or 80 lambs/kids. The Heatwave® maximises DLWG by allowing the young ruminant to drink little and often.	Single

### CALF MILK TAXIS

<b>Wydale MKM1</b> 	110 ltr milk trolley & mixer. The Wydale Milk Mixer has been designed to eliminate labour intensive hand mixing and carrying of milk. It's rapid mixing action reduces powder to liquid in seconds whilst the translucent tub allows accurate measurement of liquid.	Single
<b>Wydale MKM10P</b> 	110 ltr 4 wheeled milk trolley & mixer. 4 Wheel Mobile Milk Mixer 110 Litre Takes the effort out of transporting milk around the farm. 240 Volt Electric mixing with 24v rechargeable battery operated pumping system delivering up to 45 Litres per minute.	Single
<b>H &amp; L Milk Taxi 4</b> 	Premium quality milk taxi "The best of the best" - 100ltr, 150ltr & 260ltr versions. The milk taxis 4 revolutionises bucket feeding of calves. The Milk Taxis 4 has the ability to accurately mix and feed pre-determined quantities of milk powder which will reduce the risk of mistakes occurring during the feeding process. Smart Mix calculates the exact amount of water and powder required and Smart ID identifies the calf or pen and distributes the correct amount of milk according to a pre-set feeding curve.	Single
